COMPLIANCE MONITORING THROUGH TECHNOLOGY

INDIA'S LEADING COLD CHAIN LOGISTICS COMPANY

CHAMBER MONITORING SYSTEM

The Chamber Monitoring Application enables accurate and on time chamber temperature monitoring at the warehouse locations across India. With the help of the application, one can have access to minute to minute updates of Chamber up and down time, temperature as well as door opening and closing status over the mobile phones anytime. The application provides live access to chamber details of 285 Chambers PAN India.

This application can be easily installed on smart phones, it captures on time chamber temperature as well as door opening and closing details. As per future development this application will also send temperature variation notifications and popups to minimize temperature variations.

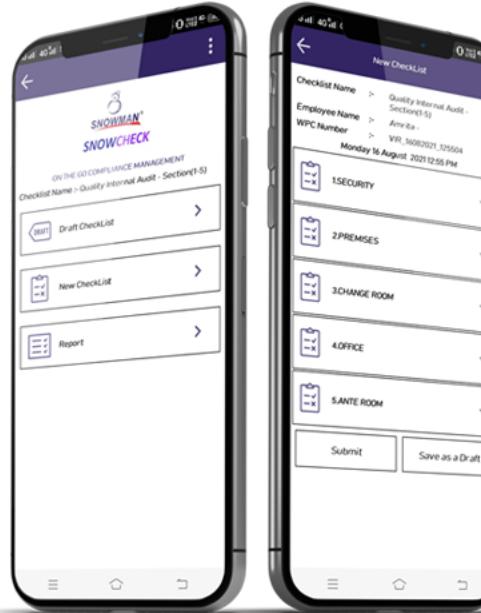

In the application, the chambers can be seen bifurcated into 3 buckets based upon the temperature limits namely:

- Within range:
- Below range:
- Above range:

Hence the app. provides prompt information about chamber's temperature variability.

Warehouse Compliance Management Application

The Snowman Quality, Operations, Transport and Technical Assessment Application enables on time monitoring of warehouse operations and overall activities through online checklists.

These checklists include various compliance points which are entered by warehouse personnel which can thereby help in keeping a close track of activities across warehouse locations PAN India. The application includes functionality to save various checklists and search checklists after entry.

The application works online, the app captures GPS location of the user while checklist data entry.
